

# Ayrton San Joaquin

🔬 **RESEARCHER - TRUSTWORTHY AI** | MLOPS ENGINEER | DATA SCIENTIST | ✍️ **TECHNICAL WRITER**

✉️ [ayrton@aya.yale.edu](mailto:ayrton@aya.yale.edu) | 📍 Singapore | 🌐 [ajsanjoaquin](#) | 📺 [ajsanjoaquin](#) | 🔗 [Values](#)

## Education

### Yale-NUS College

Singapore

BSC. (HONORS) IN DATA SCIENCE, MINOR IN PHILOSOPHY. **WITH HIGH DISTINCTION (SCHOLARSHIP RECIPIENT)**

August 2018 - May 2023

Focus: Computer Vision (CV) and Natural Language Processing (NLP). **Semester Abroad at University of Copenhagen.**

## Experience

### French National Centre for Scientific Research (CNRS)

Singapore

NLP RESEARCH ASSISTANT

September 2023 - Present

- Working on Dialogue Summarization for critical decision making as part of the French-Singapore Governments' DesCartes program.

### Machine Learning Safety Scholars Program, Center for AI Safety

Palo Alto, United States

SCHOLAR

June 2022 - August 2022

- Studied model failures (CV and NLP), and led research on analyzing Large Language Models (LLMs) using few-shot learning.
- Implemented various strategies in **robustness** (PGD, adversarial training), **anomaly detection** (AUROC, ViM), **calibration** (RSME, Brier scores), and **trojan attacks** (data poisoning).
- Received a grant of US\$4500 to complete the inaugural 2-month program.

### Data Privacy and Trustworthy Machine Learning Lab, NUS

Singapore

UNDERGRADUATE RESEARCHER

May 2021 - August 2021

- Led an analysis on **Unlearnable Data** as a data protection method against unauthorized Machine Learning (ML) training.
- Collaborated with Google Brain on privacy and adversarial machine learning research for my bachelor's thesis in a team across 4 time zones. **Published in a top security conference (ACM CCS) as the youngest and only undergraduate co-author.**

### Arterys (Freelance)

San Francisco, United States

DEEP LEARNING ENGINEER

March 2020 - June 2020

- Created a COVID-19 Pneumonia classifier **4 days after pandemic declaration in collaboration with A.I. Singapore.**
- Collaborated with Arterys to **deploy the model in their platform** for use by American hospitals and researchers. Model engineer in a team of 4 across 3 time zones.

## Open-Source Projects & Contributions

### What's Cooking? Multilingual Recipe Search Engine

Semantic Search, NLP

- Developed an application that allows a user to find a recipe from a 100K recipe-database given a list of ingredients in any of the 170 supported languages using Cohere's Embed model.

### Explaining Neural Networks with Meaningful Perturbations

Explainable AI, CV

- For explaining an image classifier's prediction, I implemented the algorithm described in *Explanations of Black Boxes by Meaningful Perturbation* (Fong, et. al., 2018).

### Equitable Valuation of Data Using Shapley Values

Data Governance

- Implemented the training data valuation algorithm from *What is your data worth? Equitable Valuation of Data* (Ghorbani and Zou., 2019).

### Open-Source AI

DevOps

- Added new features for major machine learning projects including Pytorch, HuggingFace Transformers, and YOLOv4 (object detection model).

## Publications

## Skills

**Programming:** Python, Java, JavaScript, GPT4All

**Machine Learning:** Pytorch, Sickit-Learn, JAX, Keras, Tensorflow, Transformers, Langchain, NLTK, Spacy

**Data:** Pandas, Querying (SQL, Kafka, MySQL, PySpark, MongoDB), Vector Database (Qdrant, Pinecone)

**MLOps:** AWS, AzureML, Snowflake, Databricks Lakehouse, Docker, Flask, Continuous Integration, Kubernetes, MLFlow
