

Ayrton San Joaquin

RESEARCHER - TRUSTWORTHY MACHINE LEARNING (PRIVACY, SECURITY) | WRITER

✉ ayrton@yale-nus.edu.sg | 📍 Copenhagen, Denmark | [in ajsanjoaquin](https://www.linkedin.com/in/ajsanjoaquin) | ajsanjoaquin.github.io

Education

Yale-NUS College

Singapore

BACHELOR OF SCIENCE (HONORS) IN DATA SCIENCE, MINOR IN PHILOSOPHY

August 2018 - February 2023

Awarded Scholarship to attend Full-time. Currently on exchange at Københavns Universitet.

Experience

Machine Learning Safety Scholars Program, Center for AI Safety

Palo Alto, United States

SUMMER SCHOLAR

June 2022 - August 2022

- Received a grant of \$4500 to attend the program.
- Led research on analyzing large language models' adaptability to new word definitions using few-shot learning.

Data Privacy and Trustworthy Machine Learning Lab, NUS

Singapore

UNDERGRADUATE RESEARCHER

May 2021 - August 2021

- Pitched and led a project to analyze Unlearnable Data as a data protection method.
- Collaborated with Google Brain on privacy attack research for my bachelor's thesis in a team across 4 timezones. Published as the youngest and only undergraduate co-author.

Arterys (Freelance)

San Francisco, United States

DEEP LEARNING ENGINEER

March 2020 - June 2020

- Created a COVID-19 Pneumonia classifier four days after pandemic declaration in collaboration with A.I. Singapore.
- Collaborated with Arterys to deploy the model in their platform for use by American hospitals and researchers. Model engineer in a team of 4 across 3 timezones.

Open-Source Projects & Contributions

Equitable Valuation of Data Using Shapley Values

Data Protection

- Implemented the training data valuation algorithm from *What is your data worth? Equitable Valuation of Data* (Ghorbani and Zou., 2019).

Explaining Neural Networks with Meaningful Perturbations

Explainable AI

- For explaining an image classifier's prediction, I implemented the algorithm described in *Explanations of Black Boxes by Meaningful Perturbation* (Fong, et. al., 2018).

COVID-19 Pneumonia Classifier for Diagnosis Triage

Medical Imaging

- Trained a Resnet-34 Convolutional Neural Network (CNN) on ~ 26,000 images with Resampling to detect Pneumonia caused by COVID-19 on xray scans ultimately to triage patients for urgent diagnosis.

Miscellaneous

Machine Learning Community

- Added new features for major machine learning projects including Pytorch, HuggingFace Transformers, and YOLOv4 (object detection model).

Publications

December 2022 San Joaquin, A., Haroen, A. , Understanding How Model Size Affects Few-shot Instruction Prompting

December 2022 San Joaquin, A., Skubacz, F. , Applying Multilingual Models to Question Answering (QA)

November 2022 Tramer, F., ..., San Joaquin, A., et.al. , Truth Serum: Poisoning Machine Learning Models to Reveal Their Secrets, ACM CCS 2022.

March 2020 San Joaquin, A., Using Deep Learning to Detect Pneumonia caused by COVID-19 Towards Data Science

Editor's Choice

Press

April 2022 Machine learning models leak personal info if training data is compromised, The Register

Skills

Programming Languages: Python, Java, R

Machine Learning in Python: Pytorch, Pytorch Lightning, NumPy, Sickit-Learn, Tensorflow, Keras, Jax

Data Management: Pandas, SQL, MS Excel

Application Deployment &

Version Control: Docker, Google Cloud, Git, Singularity
