Ayrton San Joaquin

TRUSTWORTHY ML RESEARCHER | MLOPS | TECHNICAL WRITER

■ ayrton@u.yale-nus.edu.sg | ♥ Singapore | ♥ ajsanjoaquin | to ajsanjoaquin | ♦ Values

Education

Yale-NUS College

Singapore

BSc. (Honors) in Data Science, Minor in Philosophy. With High Distinction (Scholarship recipient)

August 2018 - May 2023

Focus: Computer Vision (CV) and Natural Language Processing (NLP). Semester Abroad at University of Copenhagen.

Experience

Machine Learning Safety Scholars Program, Center for AI Safety

Palo Alto, United States
June 2022 - August 2022

SCHOLAR

· Studied model failures (CV and NLP), and led research on analyzing Large Language Models (LLMs) using few-shot learning.

- Implemented various strategies in robustness (PGD, adversarial training), anomaly detection (AUROC, ViM), calibration (RSME, Brier scores), and trojan attacks (data poisoning).
- Received a grant of US\$4500 to complete the inaugural 2-month program.

Data Privacy and Trustworthy Machine Learning Lab, NUS

Singapore

Undergraduate Researcher

· Led an analysis on Unlearnable Data as a data protection method against unauthorized Machine Learning (ML) training.

• Collaborated with Google Brain on privacy and adversarial machine learning research for my bachelor's thesis in a team across 4 time zones. Published in a top security conference as the youngest and only undergraduate co-author.

NExT++ Research Center Singapore

RESEARCHER - DEEPFAKE DETECTION

May 2020 - August 2020

March 2020 - June 2020

May 2021 - August 2021

- Preprocessed 200,000 images from FaceForensics++ Dataset and trained various detector models (Based on EfficientNet and Xception Net) using a High Performance Computing Cluster.
- · Adapted various robustness strategies against adversarial noises (e.g. Adversarial Training, Randomized Smoothing)

Arterys (Freelance)

San Francisco, United States

DEEP LEARNING ENGINEER

• Created a COVID-19 Pneumonia classifier 4 days after pandemic declaration in collaboration with A.I. Singapore.

• Collaborated with Arterys to deploy the model in their platform for use by American hospitals and researchers. Model engineer in a team of 4 across 3 time zones.

Open-Source Projects & Contributions

What's Cooking? Multilingual Recipe Search Engine

Semantic Search, NLP

• Developed an application that allows a user to find a recipe from a 100K recipe-database given a list of ingredients in any of the 170 supported languages using Cohere's Embed model.

Explaining Neural Networks with Meaningful Perturbations

Explainable AI, CV

• For explaining an image classifier's prediction, I implemented the algorithm described in *Explanations of Black Boxes by Meaningful Perturbation (Fong, et. al., 2018)*.

Equitable Valuation of Data Using Shapley Values

Data Governance

- Implemented the training data valuation algorithm from What is your data worth? Equitable Valuation of Data (Ghorbani and Zou., 2019).

 Open-Source Alf
- Added new features for major machine learning projects including Pytorch, HuggingFace Transformers, and YOLOv4 (object detection model).

Skills

Programming: Python, Java, GPT4All, Vicuna, Alpaca

Machine Learning: Pytorch, NumPy, Sickit-Learn, JAX, Keras, Tensorflow, Transformers, NLTK, Spacy

Data: Pandas, SQL, PySpark, Vector Database (Qdrant, Pinecone)

MLOps: Docker, Git, Flask, Continuous Integration, AzureML, Kubernetes, MLFlow, Singularity
